

## Healthcare Industry Expertise »

Aciron has worked with healthcare organizations on projects including:

- Automated financial reporting applications
- Contract management systems
- Software evaluation and selection
- Intranets and extranets

## Consulting Services »

Aciron has worked extensively with clients in the healthcare industry to deliver **results that meet clients' unique needs**. Our team of dedicated consultants act as unbiased advisors, sounding boards, & partners, providing **actionable recommendations and strategies** for clients' long-term success. Some of the services we provide include:

- Management and strategy consulting
- Business process reengineering
- Custom web portal development
- Database and web application development

## Case Study »

A **world-renowned hospital network** wanted to streamline its inefficient reporting process in compliance with the Tax Equity and Fiscal Responsibility Act (TEFRA).

Aciron developed an **electronic reporting system** that enables physicians to log hours and for administrators to generate TEFRA reports digitally. The new paperless reporting process saves hospitals time and money, and increases efficiency.

## Our Company

Aciron Consulting, Inc. is a boutique, full-service management and technology consulting firm based in Cambridge, MA – right outside of Boston. At Aciron, our goal is to help our clients achieve their full potential through our innovative management and technology consulting services and solutions.

## Our Approach

Aciron works very closely with clients to identify, define, and document the key requirements for each project. Our consultants have a client-centered approach and actively engage the client throughout the entire process.

By using visuals and constantly communicating, in the end we deliver systems that perform as conceptualized by the customer.
